

# Exploration Framework Atlas Series:

## Volume 3: The Central Andes

by

**Lorcan Kennan, James Pindell**  
**Tectonic Analysis, Ltd**

incorporating:

**Southernmost Colombia**  
**Ecuador**  
**Peru**  
**Bolivia**  
**Northern Chile**  
**Northern Argentina**

**Volume 1: Colombia**  
**Volume 2: Venezuela-Trinidad**  
**Volume 4: Mexico, Gulf of Mexico**  
**Volume 5: Neogene of Trinidad**

**Tectonic**  
**Analysis**

# TABLE OF CONTENTS

## INTRODUCTION AND PLATE TECTONIC CONTEXT

Page	Topic
i	Digital Topography, Acknowledgements, Copyright statement.
ii	Table of contents.
1	Geological outline. Physiography. Generalised geological map.
2	Some outstanding geological problems. Plate tectonic context. Areas of steep and flat slab subduction. Cross-sections of subduction geometry.
3	Latitudinal segmentation of the Andes. Subduction parameters and their influence on tectonics. Changes in azimuth and rate of plate motions since the Late Cretaceous.
4	Relative motions of South American and Nazca Plates. Plate motions in the Atlantic Hotspot Reference Frame. Volcanism through time.
5	Thermal effects of flat slab subduction. Cyclic orogenesis model in which rheology beneath arc controls regional structural style.
6	Why else might flat slab subduction develop? Large scale controls on stratigraphy. Outline of a new model: "Volcanogenetic Sequence Stratigraphy". A new paradigm to explain stratigraphic evolution of the Central Andean Foreland since ca. 55 Ma.
7	Volcanism as a control on stratigraphy. Consequences for stratigraphic of changed tectonic regimes in the High Andes. Introduction to map of seismic and active volcanism.
8	Seismicity, neotectonics, extent of basement-involved faulting.
9	Use of digital topographic to constrain crustal shortening in our palinspastic grids. Palaeomagnetic rotations from Peru.
10	Palinspastic maps for Aptian, Cenomanian, Middle Oligocene and Late Miocene times.

## PALEO GEOGRAPHIC EVOLUTION

11	Lower Palaeozoic paleogeographic elements. Ordovician through Silurian evolution.
12	Lower Palaeozoic paleogeographic maps: Late Ordovician, Middle Silurian and Middle Devonian.
13	Devonian through Mississippian evolution. Eohercynian deformation.
14	Middle Mississippian paleogeographic map.
15	Pennsylvanian and Early to Middle Permian evolution.
16	Pennsylvanian paleogeographic map.
17	Tardihercynian deformation. Middle Permian to Early Triassic red bed sedimentation. Late Triassic to Early Jurassic evolution.
18	Early and Middle Permian paleogeographic map.
19	The problem of the "Jurua Orogeny".
20	Latest Permian to Early Jurassic paleogeographic map.
21	Middle Jurassic and Cretaceous paleogeographic elements. Middle to Late Jurassic Evolution.
22	Middle and Late Jurassic paleogeographic map.
23	Early Cretaceous Fluvio-deltaic sedimentation. Aptian-Albian paleogeographic evolution.
24	Valanginian-Barremian paleogeographic map.
25	Relationship between Caribbean and South American Plates. Subduction polarity reversal. Cause of active tectonic foreland subsidence.
26	Aptian-Albian paleogeographic map.
27	Pacific origin for Piñon Terrane. Cenomanian-Santonian evolution.
28	Cenomanian-Santonian paleogeographic map.
29	Campanian Maastrichtian evolution. Active, driven foreland basin subsidence and end of Bolivia-Argentina rifting.
30	Campanian Maastrichtian paleogeographic map.
31	Early and Middle Palaeocene evolution. Middle Palaeocene to Middle Eocene early Andean ("Incaic" evolution).
32	Middle Palaeocene to Middle Eocene (60-42 Ma) paleogeographic map. Onset of Eastern Cordillera Uplift, Zongo-San Gaban Zone. Early shortening in the Marañón fold-thrust belt.

33	Dating the early rise of the Eastern Cordillera (Zongo-San Gaban Zone). Late Eocene evolution.
34	Late Eocene (42-35 Ma) paleogeographic map. Volcanic flare-up in north-central Peru, burial of "Incaic unconformity".
35	End of pull-apart basin formation at the "tail" of the Northern Andes, Tracing the "Huancabamba Lineament". Latest Eocene to Middle Oligocene evolution.
36	Latest Eocene and Early Oligocene (35-29 Ma) paleogeographic map. Volcanic hiatus. Age of Pozo formation. Basin development in south Peruvian Altiplano.
37	Late Oligocene paleogeographic evolution.
38	Late Oligocene (29-23 Ma) paleogeographic map. Volcanic flare-up in Peru and Ecuador. Renewed subsidence in foreland. New dates for Subandean sequences.
39	Early Miocene to Middle Miocene paleogeographic evolution.
40	Early Miocene (23-17 Ma) paleogeographic map. Andean deformation spreads to north and south. Uplift of Huaracayo anticline. Widespread ignimbritic volcanism.
41	Middle Miocene paleogeographic evolution, continued.
42	Middle Miocene paleogeographic map. Volcanism spreads throughout the central Andes. Onset of Puna uplift. Age of the Pebas formation.
43	Late Miocene to Recent paleogeographic evolution. Age of the most recent flat slab event in Central Peru.
44	Late Miocene to Recent paleogeographic map. Uplift of frontal anticlines. Onset of flat slab subduction and basement-involved faulting in central Peru. Deformation of Bolivian Altiplano.
45	Late Miocene to Recent paleogeographic evolution, continued.

## ANALYSIS OF SEMI-BALANCED CROSS-SECTIONS

46	Cross-sections of Santiago and Huallaga Basins. Depth to possible salt (low volume?) detachments. AFT age constraints.
47	Cross-section of north Bolivian Subandes. Age constraints. "Main Subandean Thrust" and the space-filling problem.
48	Cross-section of south Bolivian Subandes. Uplift of palaeoerosion surfaces in the Cordillera. K-Ar, indirect age constraints.

## CONCLUSIONS FOR HYDROCARBON SYSTEMS AND BASIN SUMMARY CHARTS

49	Some conclusions for hydrocarbon explorationists.
50	Generalised North Peruvian fore-arc: Talara basin.
51	Ecuadorian Oriente Basin.
52	Santiago, Marañon Basins.
53	Huallaga/northern Ucayali Basin.
54	Southern Ucayali, Madre de Dios Basins.
55	Northern Bolivian Subandes (Beni Basin).
56	Central Bolivian Subandes (Boomerang area).
57	Southern Bolivian Subandes (Chaco Basin).
58	Peruvian Altiplano, Cuzco Basin.
59	Bolivian Altiplano; Corque, Poopo Basins.

## STRATIGRAPHIC LOGS, THIN SECTIONS AND AGE DATA

60	Vivian sandstone: field observations, litho- and chronostratigraphy.
61	Thin sections, Oriente Formation, Pongo de Manseriche.
62	Thin sections, Chonta Formation, Pongo de Manseriche.
63	Thin sections, Vivian Formation, Pongos de Manseriche & Huaracayo.
64	Stratigraphy, heavy minerals, age data from the Cenozoic sections at Pongo de Huaracayo and Pongo de Manseriche (Santiago Basin).

The accompanying CD-ROM contains digital versions of all files for this atlas (editable files from Deneba Canvas X cross-platform, printable files from PDF, selected files in geotiff format) and a full bibliography).
