Volume 3: Ecuador-Peru-Bolivia  
Volume 4: Gulf of Mexico**

# CONTENTS

## CONTENTS

### Page Topic

#### Regional Context:

- 1 Digital topography and bathymetry.
- 2 Geological and morphotectonic features of the northern Andes.
- 3 Regional northern Andean context. Outline maps of major geological elements, terranes, terrane boundary faults.
- 4 Plate kinematic context. Initial Pangea rifting and breakup.
- 5 Opening of the Proto-Caribbean Seaway and formation of the Colombian “passive” margin.
- 6 Post-Aptian circum-Caribbean orogen and development of a Caribbean orogen adjacent to the former “passive” margin.
- 7 Campanian to present Caribbean orogeny. Transition from Caribbean-related to Farallon-related active margin. Caribbean–South America relative motion from regional models.
- 8 Back-arc basin closure - insights from Colombia to Margarita.

#### Palinspastic mapping of the Northern Andes:

- 9 Primary fault offsets. Vector triangles summarizing strain estimates.
- 10 Palinspastic basemaps from Triassic to present.
- 11 Expanded view of geological relationships between terranes.

#### Paleogeographic and paleotectonic evolution of Colombia:

- 12 Stages of development of the Colombian Cordillera.
- 13 Triassic paleogeography. Oldest rift events in Colombia.
- 14 Jurassic paleogeography. Development of Bogota Basin.
- 15 Background to the Cretaceous stratigraphic record.
- 16 Cretaceous stratigraphic columns by region.
- 17 Paleogene and Uppermost Cretaceous stratigraphic columns for selected Colombian basins.
- 18 Sequence stratigraphic for the Jurassic–Cretaceous of the Upper and Middle Magdalena Basin, Eastern Cordillera and Llanos Basin.
- 19 Sequence stratigraphic for the Jurassic and Cretaceous along the axis of the Magdalena Basin and western Eastern Cordillera.
- 20 Berriasian–Valangian paleogeography. Incipient separation of Yucatán and northernmost Colombian transform margins.
- 21 Hauterivian–Barremian paleogeography. Development of thermally-subsiding near-passive margin. Linkage of Proto-Caribbean and Colombian Marginal Seaways.
- 22 Aptian–Lower Albian paleogeography. Incipient interaction with Caribbean Plate.
- 23 Middle and Late Albian paleogeography. Northeastward advance of Caribbean Plate west of Colombia. Regional transgression.
- 24 Early and Middle Cenomanian paleogeography. Early La Luna highstand tract and progradation.

- 25 Late Cenomanian paleogeography. Regional regression.
- 26 Early Turonian paleogeography. Regional transgression.
- 27 Middle Turonian–Coniacian paleogeography. Source rock.
- 28 Santonian–Early Campanian paleogeography. Uplift in the west.
- 29 Transition to well-defined Caribbean-related active margin.
- 30 Mid-Campanian–Mid-Maastrichtian paleogeography. Arrival of first definitely west-derived clastics on former passive margin.
- 31 Late Maastrichtian–Early Paleocene paleogeography.
- 32 Late Paleocene paleogeography. End Caribbean foredeep phase.
- 33 Early Eocene paleogeography. Onset of uplift above an east-dipping Caribbean Plate subducting beneath Colombia.
- 34 Concept of an “anti-bulge basin” and associated stratigraphy.
- 35 Block faulting in the Putumayo Basin.
- 36 “Eocene unconformity”: origin and extent.
- 37 “Eocene unconformity”: implications for hydrocarbon systems.
- Cordillera Real–Central Cordillera dextral ductile shear.
- 38 Brittle faulting on the Huancabamba-Palestina Fault Zone.
- Offset estimates, rates of Eocene and older dextral shear.
- 39 Latest Middle Eocene paleogeography. Subduction slowdown and relaxation of the Early Eocene orogen.
- 40 Latest Eocene–Earliest Oligocene Paleogeography. Development of regional lake systems above Early Eocene orogen.
- 41 Core descriptions from Latest Eocene–Earliest Oligocene wells.
- 42 Sequential balanced and restored cross sections, Eastern Cordillera.
- 43 Rationale and implications, restored cross sections.
- 44 Late Oligocene–Early Miocene paleogeography.
- 45 Foredeep basins developed during “Andean” orogeny.
- 46 Late Middle Miocene paleogeography.
- 47 Late Miocene to Pliocene paleogeography.
- 48 Pliocene to Recent paleogeography (continued).
- 49 Seismicity and neotectonics.

**COPYRIGHT, 1998-2009, Tectonic Analysis, Ltd.** No reproduction, copy, or transmission of parts or all of this report, its accompanying portfolios, or its computer files and databases, is permitted without prior written consent of Tectonic Analysis, Ltd. Appropriate uses of this report and its data are defined by the terms of a license agreement between Tectonic Analysis, Ltd. and licensees. Copyright is not claimed on figures included herein which derive from other, referenced, scientific works.

**Acknowledgements:** We thank the following persons and entities for invaluable contributions to this report. The original 1998 report on which this atlas is based, “The Colombian Hydrocarbon Habitat: Integrated Sedimentology, Geochemistry, Paleogeographic Evolution, Geodynamics, Petroleum Geology, and Basin Analysis”, was written by Dr. James Pindell, Dr. Richard P. George, Jr., Dr. Lorcan Kennan, Dr. Julio Cristancho and Dr. Roger Higgs. Ecopetrol management was instrumental in supporting the study from the start, and in providing proprietary data. We thank Dr Victor Eduardo Pérez, Dr Plutarco Teatín, Dr Jorge Luis Rodriguez, and Dr Egon Castro for their backing. In addition, Mr Diego Urrutia proved immensely able at information collection and organization, and provided first-rate assistance during work at the core labs of the Instituto Colombiano de Petroleo. ICP is kindly thanked for their time, assistance, and scientific contributions at the Bucaramanga core lab. We thank Dr Hermann Duque-Caro for discussing his insights on the geology of Colombia with us, Dr James Kellogg for providing early access to GPS data from Colombia, and Mr. Christopher Hobbs for his assistance with drafting. We thank Dr Ken Tabbutt for data management, drafting, and report production.

# CONTENTS

## Implications for hydrocarbon systems:

- 50 Regional maturation and migration maps – Paleocene–Eocene and Oligocene.
- 51 Regional maturation and migration maps – Middle Miocene and Present-day.
- 52 Tectono-genetic Stratigraphic Summary Chart.
- 53 Summary, conclusions based on integrated paleogeography.
- 54 Exploration characteristics of Middle Magdalena Basin and Upper Magdalena Basin.
- 55 Basin event chart – Middle Magdalena Basin.
- 56 Basin event chart – Upper Magdalena Basin.
- 57 Exploration characteristics of Lower Magdalena Basin and Cesar-Rancheria Basin.
- 58 Basin event chart – Lower Magdalena Basin.
- 59 Basin event chart – Cesar-Rancheria Basin.
- 60 Exploration characteristics of Catatumbo Basin and Guajira Peninsula.
- 61 Basin event chart – Catatumbo Basin.
- 62 Basin event chart – Guajira Peninsula.
- 63 Exploration characteristics of Llanos/Yavi Basin and Putumayo Basin.
- 64 Basin event chart – Llanos Basin.
- 65 Basin event chart – Putumayo Basin.
- 66 Exploration characteristics of Sabana de Bogota/Paz del Rio Basin and Cauca-Patia Basin.
- 67 Structure map, Oriente and Putumayo Basins, base Cretaceous level.
- 68 Basin event chart – Sabana de Bogota/Paz del Rio Basin.
- 69 Basin event chart – Cauca-Patia Basin.
- 70 Exploration characteristics of San Jacinto and Sinú Belts.
- 71 Basin event chart – San Jacinto accretionary prism.
- 72 Basin event chart – Sinú accretionary prism.
- 73 Exploration characteristics of Pacifico Basin.
- 74 Basin event chart – Pacifico Basin.

- 75 Exploration characteristics of Atrato-Urabá Basin.
- 76 Basin event chart – Atrato-Urabá Basin.
- 77 Summary of proven petroleum systems.
- 78 Summary of conjectural petroleum systems.

## Selected seismic lines from Colombian basins:

- 79 Basemap of example seismic lines
- 80 TC88-112, uninterpreted, Caribbean offshore.
- 81 HUMA90-02, Guajira.
- 82 HUMA90-04, Guajira
- 83 CR88-1100, Cesar-Rancheria Basin.
- 84 BC91-950, Lower Magdalena Basin, 1 of 2.
- 85 BC91-950, Lower Magdalena Basin, 2 of 2.
- 86 CA90-1687, Lower Magdalena Basin, 1 of 3.
- 87 CA90-1687, Lower Magdalena Basin, 2 of 3.
- 88 CA90-1687, Lower Magdalena Basin, 3 of 3.
- 89 TX88-206, Catatumbo Basin.
- 90 MMV Composite 4, Middle Magdalena Basin, 1 of 2.
- 91 MMV Composite 4, Middle Magdalena Basin, 2 of 2.
- 92 MMV Composite 5, Middle Magdalena Basin, 1 of 2.
- 93 MMV Composite 5, Middle Magdalena Basin, 2 of 2.
- 94 T93-1220, Eastern Cordillera.
- 95 BP88-03, uninterpreted, Eastern Cordillera, 1 of 2.
- 96 BP88-03, uninterpreted, Eastern Cordillera, 2 of 2.
- 97 BP88-07, Eastern Cordillera, uninterpreted.
- 98 CHV-CH-S91-02, Eastern Cordillera.
- 99 RC92-06 and T(82)-09, uninterpreted, Llanos Orientales.
- 100 TB107-87, uninterpreted, Upper Magdalena Basin.
- 101 EU86-02, uninterpreted, Uppermost Magdalena Basin, 1 of 2.
- 102 EU86-02, uninterpreted, Uppermost Magdalena Basin, 2 of 2.

- 103 CP90-1160, Cauca-Patia Basin.
- 104 NT90-1090, Pacifico Basin, 1 of 2.
- 105 NT90-1090, Pacifico Basin, 2 of 2.
- 106 VI92-1100, Southeastern Colombian foreland, uninterpreted, 1 of 2.
- 107 VI92-1100, Southeastern Colombian foreland, uninterpreted, 2 of 2.
- 108 OR92-01, Putumayo Basin.
- 109 CAQ88-01, Putumayo Basin.
- 110 CAQ88-01, Putumayo Basin.
- 111 CAQ88-01, Putumayo Basin.
- 112 PW89-1460, Putumayo Basin.

## Appendices:

**1:** Kennan and Pindell, 2009, Dextral shear, terrane accretion and basin formation in the Northern Andes: best explained by interaction with a Pacific-derived Caribbean Plate. In press, Geol. Soc. London, 2009.

**2:** Pindell and Kennan, 2009, Tectonic evolution of the Gulf of Mexico, Caribbean and northern South America in the mantle reference frame: an update. In press, Geol. Soc. London, 2009.

**3:** Supporting additional maps from “The Colombian Hydrocarbon Habitat”.

## Other Colombia reports and data:

**1:** Portfolio of 64 interpreted seismic lines (of which 18 included here).

**2:** Portfolio of uninterpreted seismic lines (of which 6 included here).

**3:** SEG Y and Navigation data for portfolio seismic lines.

**4:** Scanned paper seismic lines from selected basins (total of 183 lines).

**5:** Sedimentological core studies of 37 key Colombian wells, 37 plates.

**6:** Hydrocarbon geochemistry of Colombian basins, 185 pp, 30 tables, 112 figs.

**7:** Cretaceous Biostratigraphy of Northern South America.

All the above reports and data are non-exclusive and available for purchase individually or as a package with this atlas. More information can be found on our website, or you are welcome to contact us directly:
